

AMISHA PANDEY

Jaipur, India - Open to Remote | +91 8780985652 | amisha.pandey2006@gmail.com | Open to Remote | [LinkedIn](#) | [GitHub](#)

Professional Summary

AI/ML and IoT-focused engineering student with experience in enterprise database operations, automated IoT data pipelines, and production-facing machine learning applications. Skilled in Python, computer vision, backend development, data validation, and workflow automation, with hands-on experience building scalable systems and integrating sensor data. Currently pursuing a B.Tech in Computer Science at Amity University Jaipur with a CGPA of 8.06/10.

EXPERIENCE

Reliance Industries Limited

2026

Trainee, Vocational Training

Jamnagar, India

- Maintain and optimize enterprise SQL database structures supporting day-to-day business operations and data-driven decision-making, including data organization, validation, and process optimization within a corporate production environment.
- Investigate a real-time visibility gap by integrating IoT sensor feeds into automated ETL/ELT pipelines, standardizing data preparation and transformation processes, and documenting the shared pipeline architecture to reduce onboarding friction and reinforce SDLC discipline across a cross-functional team.

Infosys

2026

Intern, AI/ML & Frontend

- Selected from a national applicant pool through a competitive technical evaluation for an AI/ML and frontend engineering internship.
- Integrated machine learning models into production-facing frontend systems, applying object-oriented design and clean-code practices within an agile workflow.
- Built a sign language detection system using computer vision, applying Python and OpenCV for image processing, data preparation, and model development.

PROJECTS

Hecate - Women's Digital Safety Platform

- Architected a multi-service REST system with a Python/Flask computer-vision microservice for identity verification, a Node.js/Express backend, and a React frontend, enabling CV-heavy workloads to scale independently.
- Built a multi-step data processing pipeline for identity verification that combined live liveness detection with OpenCV/Python, Aadhaar OCR, and biometric face matching, alongside AI-based content moderation and distress detection.
- Secured the platform end to end with JWT, bcrypt, CSRF protection, rate-limiting, and TOTP-based 2FA.

MedGrid - Real-Time Healthcare Management Platform

- Built a real-time healthcare data platform giving hospitals, ambulances, and patients visibility into ICU bed and blood-inventory status, reducing reliance on manual phone-based coordination.
- Implemented a fully local RAG pipeline using HuggingFace Phi-3-mini to power an intelligent hospital-finding assistant with zero cloud API dependency, and automated blood-donor notification workflows through Django SMTP to reduce manual outreach effort.

Smart Home Automation System

- Engineered an end-to-end IoT control system - an ESP32 sensor network paired with a custom web interface - giving users real-time remote control over household appliances from any browser, with a lightweight HTML/CSS dashboard closing the gap between hardware state and user awareness.

Transformer - Scroll-Driven Video Experience

- Replaced traditional video playback with scroll-driven, frame-by-frame canvas animation, applying advanced browser API techniques and performance tuning to render hundreds of frames dynamically while keeping playback smooth at scale.

EDUCATION

B.Tech, Computer Science & Engineering

2025 - 2029

Amity University Jaipur

- **GPA:** 8.06 / 10.0

Technical Skills

- **Languages:** Python, JavaScript, C, Arduino C, HTML, CSS, SQL, Java
- **Web Development:** React, Node.js, Express, Flask, Django, REST APIs, HTML, CSS
- **AI/ML & IoT:** LLM Integration, RAG Pipelines, HuggingFace, Computer Vision (OpenCV), Arduino, IoT Sensor Networks, Hardware-Software Integration, Machine Learning, Generative AI
- **DevOps & Tools:** Docker, Vercel, n8n Workflow Automation, Git & GitHub, LaTeX
- **Data Engineering & Analytics:** Data Engineering, ETL/ELT, Data Preparation And Transformation, Data Visualization, Modern Data Architectures

Achievements

- **Top 10-** Frontend wars 2.0
- **Top 15 of 5,745 participants:** Frontend Battle 3.0, conducted by IIT Bhubaneswar
- **7th position-** ELUSOC, conducted by Edulinkup
- **Patent (Filed):** Application No. TEMP/E1/75699/2026-DEL - under examination

Languages

- English(Advanced)
- Hindi(Native)
- German(Intermediate)

- Gujarati(Intermediate)
